1. The following is an examiner's statement of reasons for allowance:

With regards to the drawings, Examiner notes that the rod being captured in or disposed within the aperture of the actuator is adequately shown in figure 3 of the instant invention. Accordingly, the drawing objection is withdrawn.

With regards to the claims, Laveley as well as the other prior art of record show the complementary engaging means between the outside of the end of the worm and the inside of the actuator including complementary engaging splines. The independent claims require that the complementary engaging means comprise helical teeth. It would not have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the complementary engaging splines to include complementary engaging helical teeth since it would have destroyed the arrangement in which relative rotation between the end of the worm and the actuator of Laveley (and the other prior art references) is prevented. Accordingly, the claims are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melody M. Burch whose telephone number is 571-272-7114. The examiner can normally be reached on Monday-Friday (6:30 AM-3:00 PM).
